SECRET DOCUMENT LEVEL 5

FROM : TNSA SPECIAL SCIENCE DEPARTMENT

SUBJECT : ALIEN HOAX

We discovered on July 4, 1947 at 8:43 pm, in Roswell in New Mexico, an extraterrestrial type aircraft made of platinum composite. Inside the vehicle was a lifeless body of what appears to be an alien.

All of the discoveries were taken to Area 51, in partnership with the CIA for scientific research on new energy sources.

However, some journalists on site saw us and took photos. The CIA hitman Michael Smith's (also called « 47 ») contract was refused by the director of the TNSA. The media communication team therefore prepared a smear campaign for us following the publication of the photo of the alien body.

The objective is to discredit the journalists and to mount what the Americans call HOAX (or fake news). CIA looks anormaly agree with our proposition. We have already sent 1,049 messages to over 405 local newspapers. We also threatened the journalists present on the ground so that they remain silent.
